### GENERAL INFORMATION

Children will receive 5 one hour session per week per subject, Monday through Friday. They will be tutored in small groups working on similar instructional levels. Classes will be held daily between the hours of 8:30 am and 11:30 am. Students are encouraged to stay the entire 3 hours to complete homework and work on summer packets and other academic skills with certified faculty.

What are the advantages of a summer enrichment program for your child?

1. Instruction is custom-tailored to your child's needs.
- 2 The smaller group instruction allows the teacher to target and remediate specific areas of weakness.
3. Your child will not lose skills in reading and math over the summer months. **Your child may actually gain skills not currently achieved.** He or she will begin the year in a better position to enjoy a successful school experience.
- 4 Students are provided with guidance as they complete their summer math and reading packets. Also, a daily 15-30 minute reading period of high quality literature is incorporated into the lesson plan in order to sharpen comprehension skills and prevent "summer loss" that can occur with too much unstructured time.

### SUMMER ENRICHMENT
